LETTER OF RECOMMENDATION

I am Dr. Vinodray Thumar, Assistant professor from the Department of Computer Engineering – Vishwakarma Government Engineering College. I have the great pleasure that I am writing this letter of recommendation for _____ to support his application who is keen to pursue his higher studies at your esteemed institution. I have known him for the past 3.5 years as an undergraduate student at Vishwakarma Government Engineering College where I was his classroom professor for the subjects Data Structures in 3rd semester, and Professional ethics in 5th semester. During this period, I observed his outstanding critical thinking skills and he always found distinct and subtle solutions.

I must say that his views and vivid perception are always unique, involving lot of creativity; not only that, but he also listens to others with an open mind, making him more versatile and good listener. In addition to this, his presentation and communication skills for project show his confident nature by which he can express his thoughts and aspects in a more lucid way than any other.

Darsh has been exceptional student and has secured an overall of 7.83 in a maximum possible academic rating of 10 points. Furthermore, I have carefully observed his report with our college staff members and appreciate his calm approach under challenging situations. He was always punctual and serious about his work. I believe his passion for this learning will definetely allow him to reach new heights in his future life and wish him all the success.

Overall, _____ is a diligent individual and would truly be an imperative addition to your prestigious institution. Please do not hesitate to contact me for any further information.

Regards,

Asstt. Professor
Computer Engg. Deptt.
Vishwakarma Govt.Engg.College
Chandkheda, Ahmedabad
