

Name:

Proposed University: IBS International Business School

Proposed Course: AI and Data Analytics

STATEMENT OF PURPOSE

I,

with my family on permanent basis
glad to have this opportunity to put forth the letter of intent reflecting my
academical progression which has led me to pursue higher education by deciding
to take the course of AI and Data Analytics BSc at IBS International Business
School, Hungary.

I belong to family who gave me a better life and good quality of education which
they achieved in their life by becoming well educated, but I am fortunate to have
such a supporting father Mr. Bhil is encouraged me by
being supportive towards me to continue my higher education as I always had
this dream to pursue post-graduate studies and my loving mother Mrs. Daxaben
mother has nurtured me ethical values.

Academic Journey:

After completion of my secondary school education (S.S.C) in March-2018 with
50.66% and did Diploma in Computer Engineering with 8.30 CGPA in October -
2021, being enthusiastic in core of Computer and Technology, I decided to study
AI and Data Analytics BSc at IBS International Business School, Hungary.

Why Hungary?

As I consider my options for studying abroad, I find Hungary to be an appealing
choice for several reasons. Firstly, Hungarian universities have a renowned
reputation for providing top-notch education. I can opt for programs taught in
English, which makes them accessible to me as an international student.
Additionally, Hungary offers relatively affordable tuition fees compared to other
European countries, making it a practical choice for me. Its central location in
Europe also appeals to me, as it would allow me to easily explore neighboring
countries and experience diverse cultures. Moreover, Hungary's rich cultural
heritage, vibrant arts scene, and historical landmarks intrigue me, offering a
unique cultural experience. With a wide range of study programs available across
various disciplines, I am confident I can find a program that aligns with my

interests and career aspirations. Furthermore, Hungary's scholarship opportunities, such as the Stipendium Hungaricum Scholarship Program, could provide financial assistance to me. Lastly, Hungary's reputation for safety and its welcoming atmosphere, especially in cities like Budapest, reassure me that I would feel comfortable and supported during my time studying there. Overall, I believe Hungary presents a compelling option for my international education journey.

Why AI and Data Analytics in IBS International Business School?

As I deliberate on my decision regarding where to pursue my AI and Data Analytics, I find IBS International Business School to be a compelling choice for several reasons. Firstly, it boasts a strong reputation for its Computer Science Engineering program, which aligns with my academic interests and career goals. I am particularly drawn to the IBS International Business School modern facilities and resources, which I believe will enhance my learning experience and skill development. Additionally, IBS is famous for its highly practical and student-focused approach that results in an outstanding employment rate after graduation & esteemed faculty members and their expertise in the field assure me of receiving high-quality education and guidance throughout my studies. Furthermore, the IBS emphasis on practical, hands-on learning opportunities, such as internships and research projects, resonates with my desire for real-world experience. Overall, I am confident that choosing IBS for my AI and Data Analytics would provide me with the foundation and opportunities I need to succeed in my future endeavors.

Future Goals:

Graduating from a reputed university in Hungary, I will be returning to my home country India. Considering my decision to pursue a AI and Data Analytics, I contemplate the potential trajectory of my future growth. Enrolling in this program signifies an investment in my professional development, promising a pathway to numerous opportunities and advancements in the field. Through rigorous academic training and practical experience, I anticipate acquiring a solid foundation of knowledge and skills essential for thriving in the dynamic landscape of technology. I am drawn to the burgeoning IT and Computer sector, which is gaining prominence globally. I have a specific plan to commence my career with Infosys, a multinational IT company, as a Software Engineer initially. Following this foundational experience, I envision exploring opportunities with well-established Indian organizations like TCS. Targeting

roles such as Senior Software Developer, I understand that these firms value candidates with a solid foundation in, complemented by expertise in Computer and technology. This career trajectory not only promises a substantial income but also aligns with my desire to maintain a balanced social life within the comforting embrace of my parents' love and support, fulfilling their dream of seeing me succeed.

Thanking you

Yours Sincerely
